Wireless control system with WiFi/Zigbee functionality for water-based underfloor heating systems

The stylish thermostat with WiFi functionality is a programmable thermostat designed to control water-based underfloor heating systems. The HeatLink app is available in the Apple App Store and on Google Play. Within the app, settings can be programmed and adjusted. To control multiple rooms (zones), additional **H128-T thermostats** can easily be added.

Wireless connection

The smart thermostats communicate via RF868 signals with the wireless **H128-CC** to control the zones of the underfloor heating or cooling system. The thermostats connect to the gateway using the Zigbee protocol, which links them to the WiFi router, allowing the thermostat to be controlled via the app.

H128 Control Centre with wireless communication

The **H128-CC** communicates wirelessly with the thermostats via RF 868 MHz signals and sends open and close commands to the thermal actuators. The **H128-CC** can connect to up to 8 wireless thermostats per Control Centre. Additionally, it can control up to 10 actuators per zone, with a maximum of 64 actuators per Control Centre across all zones.

Expansion

Up to 8 wireless **H128-CC's** can be cascaded via a wired link. All connected control centres are synchronized with the first unit in heating/cooling mode, which handles the signal to open or close the boiler or heat pump.

Functions

WiFi	✓ 2.4Ghz
App	✓ iOS & Android
Voice control	Google assistant and Amazon Alexa
Programmable	Up to 3 periods per day
Certification	CE

Specifications

Type	Wireless control system with WiFi
Suitable for	Water-based systems
Control	Touchscreen / App
Sensors	Room sensor / Floor sensor
Voltage	230V – 50/60Hz
Max. number of zones	64 groups per Control Centre
Max. load	10A/230V
Temperature range	+5°C/+40°C
IP rating	128CC: IP40 128-T: IP21

Technical Specifications

WARP H128 WiFi

2/2

H128-CC Control Centre wireless

Power source	100-240VAC 50/60Hz (max. 10A)
Communication	RF 868Mhz
Wireless range	Maximum 100m
Operating temperature/humidity tolerance	0~50°C, 0~80% (non-condensing)
Colour	Polarwhite (RAL9010)
Dimensions (LxWxD)	298mmx88mmx64mm
IP class	IP40

H128-T Thermostat

Power supply	2AA Batterij
Battery lifespan	1 jaar
Operating temperature/humidity tolerance	0~50°C, 0~80% RH (niet-condenserend)
Operating temperature	0~50°C
Accuracy	0,1°C
Colour	Polarwhite (RAL9010)
Dimensions (LxWxD)	100mmx100mmx19,6mm
IP class	IP21

Warranty

2-year warranty on electronic operation.
