

Technical Specifications

WARP H64 WiFi

1/2

The **H64** from **WARP Systems** is a wired control system with WiFi functionality, specifically designed for water-based underfloor heating systems.

The stylish **H64-MT** thermostat with WiFi functionality is a programmable thermostat designed to control water-based underfloor heating systems.

The HeatLink App is available in the Apple App Store and on Google Play. Within the app, settings can be easily programmed and adjusted. To control multiple rooms (zones), additional **H64-ST slave thermostats** can be added effortlessly.

Specifications

Type	Wired control system with WiFi
Suitable for	Water-based systems (by WARP Systems)
Operation	Touchscreen
Sensors	Room sensor
Voltage	230V–50/60Hz
Maximum load	16A/230V
Temperature range	+5°C/+40°C
Housing	IP21

Functions

WiFi	✓ 2.4Ghz
App	✓ iOS & Android
Voice assistant	Google assistant and Amazon Alexa
Programmable	✓
Smart control	✓
Wooden floor limitation	✓ <28°C
Open window detection	✓
Soft start	✓
Pilot Wire	✗

SUSTAINABLE

H64-CC Control Centre wired

Power supply	100-240VAC 50/60Hz (max. 10A)
Storage temperature & humidity	-10~60°C, 0~90% relative humidity (non-condensing)
Operating temperature & humidity	0~50°C, 0~80% RH (non-condensing)
Colour	Polar white (RAL9010)
Dimensions (LxWxD)	298x88x64mm
IP class	IP40

H64-MT Master WiFi Thermostat* H64-ST Slave Thermostat

Power & signal input	DC12 ~ 18V carrier, non-polar input
Storage temperature & humidity	10~60°C, 0~90% relative humidity (non-condensing)
Operating temperature & humidity	0~50°C, 0~80% RH (non-condensing)
Temperature display range	0~50°C
Display accuracy	0,1°C
Colour	White (RAL9010)
Dimensions (LxWxD)	86x86x12mm
IP class	IP21

* Additional features specific to the H64-MT Master WiFi Thermostat:

- WiFi frequency 2.4 GHz
- Wireless WiFi transmission range up to 60 meters

Warranty

2-year warranty on electronic functionality
